

WATERPROOF

Rekortan M

★★★★★

THE PROFESSIONAL CHOICE AMONG SPORTS SURFACES

The Rekortan M is an authentic professional sports surface for athletics stadiums, competitive running tracks and school-sports facilities recognised worldwide as the ideal competition surface. The Rekortan M offers exceptional acceleration performance and enhanced tread elasticity.

BENEFITS

- Excellent values when it comes to sports medicine
- The preferred surface of elite athletes the world over
- IAAF certification ensures suitability for competitions

WATERPROOF

Rekortan M

★★★★★

COMPETITION / STADIUM ■ TRAINING ■ MULTIPURPOSE / SCHOOL SPORTS

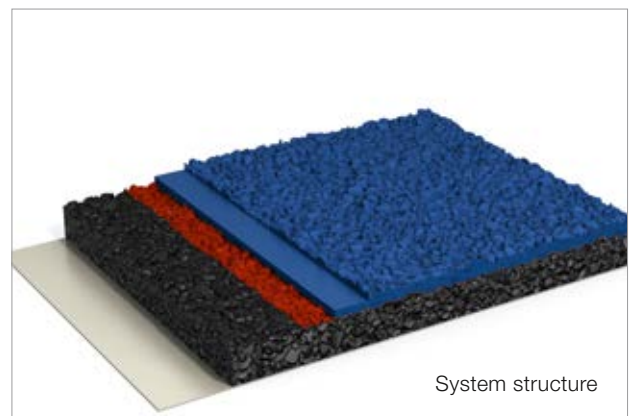

Fast with high damping properties and excellent values when it comes to sports medicine. These are all excellent prerequisites for performance and competitive sports in athletics facilities with running and run-up tracks. The Canadian, British and American track and field teams recently also felt the same thing: all three teams chose sports facilities with the Rekortan M surface for their preparation for the 2012 Olympic games in London. The Canadian athletes trained in the Kamen Kaiserau sports centre and British athletes trained on the running track at the Loughborough University in the UK. The American athletics team got in shape in the Alexander Stadium in Birmingham.

AREAS OF USE

- Athletics stadiums
- Competitive running tracks
- School sports facilities

PROPERTIES

- Poured in-situ surface
- Granules with visible tips interspersed, ideally suited to spikes
