

Rekortan®

WATER-PERMEABLE
Rekortan BS/B2S

THE ALL-ROUNDER FOR COMPETITION AND TRAINING FACILITIES

The Rekortan BS and B2S are the only sports surfaces with a structured and water-permeable top layer. This makes it the ideal solution for facilities where the local conditions or other circumstances prevent the construction of a waterproof surface

BENEFITS

- Cost-effective all-round solution
- Quick and easy installation
- World Athletics certification ensures suitability for competitions

WATER-PERMEABLE

Rekortan BS/B2S

Rekortan[®]

ATHLETIC

The Rekortan BS synthetic surface is the cost-effective multipurpose solution for athletics. The structural spray-coated surface is primarily used for running tracks, run-up tracks and athletics facilities. Together with the B2S surface from the Polytan product range, it has a structured surface that is also water-permeable, allowing for easy and fast installation.

AREAS OF USE

- Athletics stadiums
- Competitive running tracks
- School sports facilities
- Multipurpose facilities

PROPERTIES

- BS: Structural spray-coated surface
- B2S: Structural spray-coated surface with thick top layer
- Rubber granules, elastomer, spray-coated
- Water-permeable
- Can be certified according to WA requirements
