

WATERPROOF

Tartan GOLD

★★★★★

THE RUNNING TRACK FOR SETTING RECORDS

The first Tartan running track in Europe was installed in Letzigrund, Zürich, in 1968. It premiered at the Olympic Games in Mexico City that same year, and Germany's first Tartan running track was put in place in Stuttgart in 1969. This new surface set world records on the production line.

BENEFITS

- Optimum conditions due to the combined structure
- Maximum acceleration performance and excellent force absorption
- IAAF certification ensures suitability for competitions

Tartan GOLD

★★★★★

COMPETITION/STADIUM ■ TRAINING

Polytan has been constantly refining its synthetic surfaces for more than 40 years, and its new Tartan GOLD is a high-performance surface for top-class international sport. The structure combining a solid PU surface and shock-absorbing levelling layer ensures excellent durability for this synthetic waterproof surface with good force-absorption properties. The EPDM-granules dispersed in the top layer make Tartan GOLD the ideal choice for running shoes with spikes and offers extremely high acceleration performance. Energy-enhancing tread elasticity and high abrasion resistance complete the properties of this elite surface, making it perfect for setting new records!

System structure

AREAS OF USE

- Athletics stadiums
- Competitive running tracks

PROPERTIES

- Poured in situ surface, multilayer
- Waterproof
- Granules with visible tips interspersed, ideally suited to spikes
- Certified according to IAAF requireme
