WE MAKE SPORT.

Straight, textured filaments

LIGATURF CROSS R

FOOTBALL, RUGBY, AMERICAN FOOTBALL

The new LigaTurf Cross R proves that football can be sustainable, even at the top level. It combines the playing characteristics of a natural football pitch with technologies that make it as robust and low-maintenance as fully textured synthetic turf. Thanks to recycled material in the filaments, LigaTurf Cross R is also highly sustainable. LigaTurf Cross R is the perfect solution for busy professional training facilities, sports colleges, and amateur and professional clubs alike.

We continue to develop our products to be highly adaptable to changing conditions, just like in nature. Polytan LigaTurf Cross R is the ultimate proof: it has a mixture of straight and textured filaments, perfectly combining the benefits of both types of turf with sustainable innovation. Thanks to its straight LigaTurf RS+ R filaments, LigaTurf Cross R looks and feels like a natural football pitch. What's more, the textured LigaGrass Pro R filaments provide low and easy maintenance while giving greater infill stability and increased turf volume.

LIGATURF CROSS R

polytan

PROPERTIES

- Green Technology Inside: Filaments made from recycled raw materials
- Combination of straight turf filaments (365 µm fibre thickness) and textured turf filaments (255 µm fibre thickness)
- Exclusive Polytan PreciTex texturing technology
- Exclusive Polytan CoolPlus function
- Exclusive Polytan 100% PolyCoat PU wear coat with TuftGuard function
- BiColour design

GREEN
technology

We act sustainably – from the development and selection of our raw materials, to the production, installation, maintenance and recycling of our sports surfaces. Our products are designed with durability and efficient manufacturing in mind, using ecological materials and reliable processes.
