Water-permeable

# POLYPLAY FS GT

## FALL PROTECTION

PolyPlay FS GT is a classic fall-protection surface and a safe, hygienic solution for use wherever children might injure themselves during a fall – from playgrounds and kindergartens to recreational parks and rehab facilities. The surface is available in different thicknesses and colours.

Granulated and water-permeable, the PolyPlay FS GT is particularly low-maintenance. Optimal resistance to weathering and decay guarantees a long lifespan and low maintenance costs. Fall-protection surfaces are the more hygienic and, above all, safer option, compared to sandpits or bark mulch. In addition, PolyPlay FS GT uses innovative Polytan GT binder for the permanently elastic binding of the rubber granules, which saves on CO<sub>2</sub> emissions.

POLYPLAY FS GT

## PROPERTIES

- Granulated surface
- Bound coloured granules, flat-laid
- Water-permeable
- Available in different colours
- HIC-tested in accordance with DIN EN 1177

## AREAS OF USE

- Playgrounds
- Kindergartens
- Recreational parks
- Facilities for the elderly
- Rehab facilities

We act sustainably – from development and the selection of our raw materials, to the production, installation, maintenance and recycling of our sports surfaces. Our products are designed with durability and efficient manufacturing in mind, using ecological materials and reliable processes.
