

WATER-PERMEABLE

PolyPlay FS Nature / PolyPlay FS Fun

REDEFINING SOFT IMPACT SURFACES

Whether you want a natural look or a playful colour scheme, PolyPlay FS Nature and FS Fun offer architects and planners myriad design options for play areas, educational facilities, adventure playgrounds and landscaping. With these products, Polytan is expanding its range of soft impact surfaces. Both products feature a textured artificial turf surface.

PROPERTIES

- Long lifespan
- Greater protection due to shock-absorbing effect
- Low-maintenance
- Individual design: natural or playful

WATER-PERMEABLE

PolyPlay FS Nature / PolyPlay FS Fun

PolyPlay FS Nature

PolyPlay FS Fun

PolyPlay FS Nature and FS Fun are primarily used in playgrounds and kindergartens as shock-absorbing soft impact surfaces in a variety of thicknesses. PolyPlay FS Fun offers virtually unlimited possibilities for playful design, with a wide range of colours and inlays such as hopscotch or decorative elements for an individual touch. It's everything a child could dream of. PolyPlay FS Nature features a BiColour finish,

making it perfect for soft impact surfaces that have to look as natural as possible. Both surfaces are superior to natural turf, sand pits or bark mulch in terms of hygiene and safety. Their ideal resistance to weather and rotting ensures a long lifespan.
